

Fifth Step:  
Look for a place to  
put your switch. I  
placed mine into the  
cut out next to the  
cigarette lighter.

Here's the switch.  
Whenever I move  
the switch to right I  
get the audio signal  
from my ipod into  
the radio. (Of  
course, a CD has to  
be inserted into the  
cd player, to fool the  
radio that's it's  
playing a CD)  
When I move the  
switch to the left I  
get audio from the  
cd player into the  
radio.
