

## How to replace a windshield wiper's refill in 2006 Honda Civic

1. There are two different sizes of windshield wiper refills for a 2006 Honda Civic. Honda Part numbers: 76622-SNA-A01 and 76632-SNA-A01

2. First remove a top cap securing a windshield wiper to an arm.

3. Squeeze a cap on both sides and PULL away (one might use more strength to pull a cap away than at first expected).

4. Remove a windshield wiper from an arm by lifting a small latch away from a wiper then pull a wiper down.

5. Find the end of a windshield wiper with a "LOCK" typed on it; this end has to come out first.

6. With pliers, gently lift away a rubber covering a refill then pull a refill away.

7. Once a wiper refill is completely removed from a wiper, remove two metal staves from an old refill and insert them back into a new refill.

8. Slide a new refill with metal staves back inside a wiper.
